

Kyle T. Stang

kylestang2005@gmail.com – 774-201-1217

PROFILE:

Computer and Electrical Engineering student seeking education and experience through an internship/entry level position related to embedded system design, signal processing, electronics, computer hardware, and robotics/software engineering. Currently an EE intern at General Dynamics Mission Systems, working on the Hammerhead project. Two additional years' experience as an embedded systems intern at NUWC Newport, RI. Experienced in C, Rust, and Python programming, ASIC analysis and design, embedded system design, FPGA development, Linux/ROS, PCB design, Integration and Testing, and undergraduate robotics research.

EDUCATION:

University of Massachusetts – Dartmouth **ABET Accredited, Chancellor's List** GPA: 3.905

Bachelor of Science Computer & Electrical Engineering

YOG: 2027

Master of Science Electrical Engineering

YOG: 2028

WORK EXPERIENCE:

General Dynamics Mission Systems

Taunton, MA

Electrical Engineering Intern

6/2026 – Present

- Aided the Hammerhead project; Optimized and cheapened FAT with original cable design

Naval Undersea Warfare Center Division Newport

Newport, RI

NREIP Intern – Embedded Systems & Computer Architecture

6/2024 – 9/2025

- Developed Python and embedded C code while aiding the computer architecture team and PCB design

University of Massachusetts Dartmouth

Dartmouth, MA

Undergraduate Research – Computer Engineering

1/2024 - Present

- Researched/Tested AI & robotics projects; Collaborating with graduate and undergraduate students

SKILLS:

- C/Rust/Python/Assembly Programming
- Red Hat Enterprise Linux/Ubuntu
- MATLAB & DSP
- Computer Lab & Robotics Research
- OOP & Algorithm Analysis
- ROS, Multisim & PSpice
- ARM Assembly Programming
- Embedded System Design
- FPGA Design with Vivado
- Kicad & PCB Soldering

LICENSES AND CERTIFICATES:

- Active Secret Security Clearance
